DETAILED ACTION

Drawings

1. The drawings filed on 3/12/2004 are accepted by the examiner.

Claim Objections

2. Claim 14 objected to because of the following informalities: Section e) recites "a coling zone" but should recite --a cooling zone--. Appropriate correction is required.
3. Claims 15-20 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In conjunction with this objection, these claims are also rejected under 35 USC § 112 as noted below.

Claim Rejections - 35 USC § 112

4. Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15-20 are dependent upon claim 14 which recites in the preamble "a combination of devices..." However, claims 15-20 do not refer back to the combination of devices but instead refer to components of claim 14 (e.g. a heating zone according to claim 14, a fuel heat

Art Unit: 3749

exchanger..., a cooling zone..., a combustion air heat exchanger...). The scope of these claims is unclear. Does applicant intend claims 15-20 to include all the limitations of independent claim 14 or does the scope of these claims relate solely to the recited component? For the purpose of an examination on the merits the examiner has considered that claims 15-20 intend to include all the limitations of dependent claim 14. These claims should be rewritten to recite --a combination of devices according to Claim 14--.

Statutory Double Patenting

5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

6. Claims 1, 4-6, 13, 14, 17-19, and 26 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 6, 8, 9, 13, 14, 19, 21, 22, and 26 of prior U.S. Patent No. 6,736,118. This is a double patenting rejection.

Nonstatutory Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 2, 3, 7, 15, and 16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3, 5, 10, 18, and 16 of U.S. Patent No. 6,736,118. Although the conflicting claims are not identical, they are not patentably distinct from each other because. Though claims 2, 3, 7, 15, and 16 of this application are broader in scope they are claiming the same invention as claims 3, 5, 10, 18, and 16 of U.S. Patent No. 6,736,118

9. Claims 8-12 and 21-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12 and 25 of U.S. Patent No. 6,736,118. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 12 and 25 of U.S. Patent No. 6,736,118 refer to a combustion mechanism "other than a combustion engine." Claims 8-12 and 21-25 recite specific well-known types of combustion mechanisms other than a combustion engine, namely; a furnace, a process heater, a water heater, a hydronic boiler, and a warm air heater. A person of ordinary skill in the art would understand a combustion mechanism "other than a combustion engine" to include the list of well-known combustion mechanisms listed in applicant's claims 8-12 and 21-25. Accordingly, these claims are not patentably distinct from claims 12 and 25 of U.S. Patent No. 6,736,118.

Conclusion

10. This action is made non-final. A THREE month shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) months from the mailing date of this communication.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents to Gitman, Chmielewski, Bell, Craig et al., and Stone are included to further show the state of the art concerning combustion methods and apparatus.
